

PROJECT VISION

PLAYGROUND **MEETING SPACES**
SAFE EQUITABLE PATHS OF TRAVEL
FEMALE AMENITIES **FOOD + BEVERAGE CAPABILITIES**
COVERED SEATING SPACES **LOW MAINTENANCE**
STORAGE **FUNCTION ROOM** **GENDER NEUTRAL CHANGE ROOMS**

FUNCTIONALITY

First and foremost the Pavilion needs to be **MULTI FUNCTIONAL**. The existing Pavilion is widely dysfunctional whilst structural issues are becoming an ongoing safety and maintenance concern.

Specifically the existing facility was built for Men playing cricket whilst with no consideration for female cricketers, other sports or the broader student population.

The existing Pavilion provides;

- No women's amenities for players or officials significantly limiting field usage
- Change rooms designed for men and with limited privacy
- A small canteen which only opens for cricket games
- Non-compliant disabled access
- Has limited amenity and viewing opportunities

Resulting, the new Pavilion aims to address functional shortcomings by;

- Providing female and disabled amenities with privacy and compliant access
- Delivering a food & beverage capability to service the College precinct and broader community
- Upgrade existing Pavilion function space to cater for lectures, conferences, inter-varsity events and various functions
- Provide gender neutral change rooms for coaches, umpires and officials suitable for a range of sports
- Provide extensive shaded seating areas to activate the area for the broader student population and wider community

ENERGY + FUN PLACEMAKING
BUILT FORM LEGACY AWARD WINNING CONSULTANTS
DESIGN EXCELLENCE

Adjacent a major campus entry the Pavilion must showcase world leading architecture whilst accentuating the site's heritage setting, natural landscape and river connection. The Club commissioned Award winning Architects, who demonstrate deep engagement with their buildings and are experienced working within the University to focus on Design Excellence and aligning with the UQ Master Plan.

The Pavilion does this by preserving UQ's heritage and built-form legacy, while creating a new iconic building. The design demonstrates Architectural and design leadership, through its physical planning and environmental performance whilst aligning with the University's Masterplan to reinforce and celebrate the fine physical setting, creating a community hub to be enjoyed by more than just cricketers.

ACTIVATION + ENAGEMENT

Central to the Pavilion redevelopment is aligning with UQ's Strategy of creating vibrant campuses, seeing the University as a place where a broad community interacts and student life thrives.

WEP Harris Oval sits within the College precinct which is significantly under catered to in terms of food, beverage and community spaces. This has created a wonderful opportunity for the new Pavilion to activate this precinct.

The essence of great places lies in their ability to create a deep sense of community attachment by delivering a meaningful environment for people of all ages and community groups to enjoy. The Pavilion redevelopment seeks to do this by creating an iconic place which supports a range of sports and recreational activities.

The Pavilion aims to create an energetic, fun destination that contributes to life at The University of Queensland & Brisbane City

SPORTS INNOVATION HUB
CORPORATE PARTNERSHIPS **SCHOLARSHIPS + PHDS**
OUTDOOR PRACTICAL LEARNING
LEARNING + RESEARCH

The University's sporting Clubs offer significant opportunities to further its aspirational learning and research goals in ways classrooms cannot. The Cricket Club has over 400 playing members and reaches thousands more. Further, UQCC's alumni has strong private sector representation providing opportunities to leverage corporate partnerships.

Sporting communities can facilitate learning and research opportunities that cannot be found in a classroom

The new Pavilion provides facilities which enable exciting research opportunities including studies in bio-mechanics and augmented reality which the Club is discussing with corporate partners.

HERITAGE + LEGACY
SOCIAL EQUITY FINANCIAL SUSTAINABILITY
ENVIRONMENTALLY FRIENDLY DESIGN
SUSTAINABILITY

UQ Cricket's management team includes many UQ alumni with a strong focus on delivering a sustainable community orientated multi-use facility which balances financial, social and environmental goals whilst creating a benchmark facility for UQ Students to engage with.

The design aims to accentuate the campus's natural beauty and landscaping, whilst utilising elements of passive design and focusing on sustainable material selection, renewable energy and rainwater collection to minimise the Pavilion's natural environment impact.

The Club respects the University's rich cultural heritage values and recognises the importance of a diverse and inclusive campus. This philosophy underpins the development which aims to create lasting community benefit and legacy for generations to come.
